

Conclusion:

There has been a lot changed if you think about the youth facilities. Because ten years ago there weren't really good playgrounds for kids. Many people go to sports facilities to play there and meet up with friends. The people we interviewed said that they wanted to change the playgrounds with newer playground equipment like; newer swings or -slides. Because of Corona, everyone goes less outside so some people do something alone or together with one other person. Some people go walking or jogging but there are also enough people that go cycling. But before Corona there was enough to do here there were people that helped with maintaining the sportsfields or kids playing on those sportsfields.
